

Multi-Protocol RFID Printer/Encoder

CLe RFID Smart Printers

The industrial CLe high-speed printers are ideal for a range of applications, including:

-  **Compliance Labeling**
-  **Warehouse Logistic**
-  **Access Control**
-  **Asset Tracking**
-  **Baggage Tagging**
-  **Retail Labeling**
-  **Product Authentication**

Smart Printer

In a one-step process, the CLe RFID printers can read, write and print smart labels and tags with embedded RFID transponders. Transponders include integrated circuitry with an antenna and are designed to be programmed and re-programmed using radio waves.

RFID - Radio Frequency Identification

RFID tags are read, written and verified inside the printer prior to printing. In the case of a tag failure, the CLe RFID printers will mark the tag and advance to the next one, assuring top reliability in mission critical applications.

Rugged Design

The CLe's heavy-duty metal construction, proven reliability, and excellent media handling deliver optimum performance in the most demanding environments.

XML Enabled Available

Direct XML connectivity for printing across technology platforms and applications without the use of labeling software.
